

DISTRICT TECHNOLOGY PLAN

The Board of Trustees recognizes that technology can greatly enhance the instructional program as well as the efficiency of district and school site administration. The Board also realizes that careful planning is essential to ensure the successful, equitable and cost-effective implementation of technology-based materials, equipment, systems and networks.

The Superintendent or designee shall develop a plan to address the short- and long-term technology needs of the district and provide for compatibility of resources among Neil Cummins and Hall and the district office. As a basis for this plan, he/she shall examine and compare the costs and benefits of various resources and shall identify the blend of technologies and level of service necessary to support the instructional program and the efficiency of district and school site administration.

The Superintendent or designee may appoint a technology committee to assist with the above investigations and determinations.
